

**MRSA STATEMENT/ACKNOWLEDGEMENT**

Signatures within this document represent review and acceptance that the MRSA nasal screening protocol will be implemented for the patient populations defined below:

- Patients admitted or transferred into a critical care unit anywhere in the hospital (all adult critical care units, excludes telemetry)
- Patients admitted/transferred from Nursing home, Long Term Care Facility, Other Healthcare Facility (Rehab and Assisted Living Facility), Other Hospital, Jail/Prison or Homeless Shelter
- Patients undergoing total hip, total knee, open spine, and CABG procedures
- Patients with a history of MRSA (defined as a positive nasal swab within the last 365 days) may be placed directly into isolation with a nasal screen
- Dialysis patients, patients with open wounds
